

Konnyaku Sponge

Suitable for even the most sensitive skin

Press Release 22-10-11

Konnyaku is a popular Southeast Asian vegetable, rich in minerals and dietary fibre. For over a century Konnyaku has also been used by the Japanese in beauty treatments.

The unique plant fibre structure of konnyaku is ideal to create the perfect face and body sponge. Incredibly soft, yet textured, the fibres deeply cleanse and exfoliate without damaging even the most sensitive skin. Moisture-rich and naturally cleansing, they can even be used without a separate cleanser or soap.

Konnyaku is naturally antibacterial and gently re-balances the skin's pH levels. Konnyaku Sponges are hand-made from 100% food-grade konnyaku fibre with no preservatives, artificial colourings or additives.

Our Konnyaku Sponge comes in three types:

- Original - for normal/sensitive skin. 100% pure konnyaku vegetable fibre sponge
- Pink clay - for dry skin. Using mineral-rich French clay, renowned among beauty therapists for its softening effects on the skin.
- Bamboo Charcoal - for oily skin. Perfect for teen skin and those prone to acne and breakouts. Contains activated carbon and minerals that remove excess oil.

Konnyaku Sponges are available at £9.99 from selected retailers.
