We would be happy to give you a demonstration.

## NES Health Launches the NES miHealth Providing the next generation in healthcare.

The **NES miHealth** is an important development in the emerging field of energy medicine; a scientific approach to healthcare that works on your body's energy and information fields.

### What is the NES miHealth?

The pioneering science behind NES Health technology and the **NES miHealth** has grown out of research by Peter Fraser, a dynamic independent researcher and Traditional Chinese Medicine expert, who has worked tirelessly over the past ten years to develop the NES miHealth – the first informational healthcare device featuring bio-electric stimulation. It is a hand held, multi-functional device used to help optimise personal health and well-being.

In recent years there have been other devices boasting some of the features that appear in the **NES miHealth**, so what makes it so different? The simple answer is information, and it is through extensive research and development that our findings show information directs energy in the Human body-field to where blocks may inhibit the natural healing process.

Taking this one step further, Fraser discovered that combining three technologies: NES Information [i], Global Scaling [ii] and Bio Electrical Stimulation [iii], provides the perfect combination to help to correct distortions in the Human Body Field and allow the natural flow of energy, which is what in effect sets the natural healing process in motion. The combination of these three elements have shown in our many case studies to be extremely effective when used on subjects presenting; general fatigue, slow sports recovery times, sleep disorders, joint mobility and other debilitating symptoms. Currently the **NES miHealth** is being used by NES ProVision [iv] practitioners globally with some outstanding results.

# Please Visit Stand Number 2517 We would be happy to give you a demonstration.

The **NES miHealth** is a true state of the art device with its colour touch screen interface, easy to comprehend graphics and effective delivery of information either on a 'broadcast' mode or an 'on the body' mode. The **NES miHealth** is loaded with enough software to get you started on basic applications, but further, more specific software upgrades can be added to suit your modality. The Nes miHealth application are under constant development and each week more exciting application and results are emerging.

## Thomas Marquardt, Physiotherapist & Osteopath, Hamburger SV, Germany.

"As the osteopath for the professional football club, Hamburger Sport Verein, I'm work with professional athletes on a daily basis. Over the last two months we have integrated the **NES miHealth** to support our players, and we have experienced remarkable results. Our players recover faster and feel much more relaxed before games. They even want to use the **NES miHealth** themselves at home."

## Jacques Bauer, Practitioner, France.

"I am an ex-clinical pharmacist and I used to work for the world's biggest pharmaceutical company as a clinical research associate. Following my own experiences with NES ProVision, I have taken the next step forward and have started working with the **NES miHealth** device. I am now working across Europe with doctors and therapists to help integrate this next quantum leap into their everyday practice. The **NES miHealth** is a device that brings us back to our real human potential."

## Carina Di Battista, Osteomyologist, UK.

"I'm an Osteomyologist and I work at a chiropractic clinic. I have been using the **NES miHealth** with clients who are very sensitive to touch and who simply can't cope with deep massage work. What I've been looking for is a device that can do for my clients "off body", what I would normally do with them through physical massage. In the **NES miHealth**, I've found exactly the device I need."

#### **Notes to Editor:**

#### **Enclosed:**

#### **NES miHealth DVD:**

NES Health's CEO Harry Massey explaining more fully the NES miHealth. Or watch German Osteopath, Thomas Marquardt online, sharing his experience with the NES miHealth at: <http://www.neshealth.com/nes-mihealth/videos.aspx>

#### **Book:**

[Healing Yourself and Others by Mastering Energy and Information by Harry Massey](#)

In this book, Harry Massey, visionary, entrepreneur, CEO of NES Health and producer of the groundbreaking film on the new science of healing *The Living Matrix*

([www.livingmatrixshop.com](http://www.livingmatrixshop.com)) explores how, through mastering energy and information, we can heal both ourselves and others.

#### **About NES Health:**

Founded in 2001 by Harry Massey and Peter Fraser, NES Health is a company dedicated to developing a new kind of healthcare, based on the latest findings in biology. It is a socially-driven company with the aim of putting people back in control of their own health.

NES Health's mission is to optimise people's health and enhance their lives by providing high quality products imprinted with energy and information, believing that every individual body has the ability to heal itself. [www.neshealth.com](http://www.neshealth.com)

### References:

**i NES Health has mapped the Human body-field (HBF)** and, based on decades of research, has developed a unique system of healthcare which helps to identify issues in the body-field and then provide the correct information to repair them with the NES Infoceuticals, which are liquid remedies produced from purified water in which minute quantities of micro-minerals are suspended. They are directly encoded (through a proprietary process) with information that can be used by the Human body-field to correct distortions and blockages.

If you wish to read more on this topic more information can be found in the following text. Decoding the Human Body Field by Peter H. Fraser, Harry Massey and Joan Parisi Wilcox. ISBN: 978-1594772252

**ii Global Scaling (GS) describes the natural frequency of the universe.** Everyone's body optimally functions at specific frequencies but over time, due to physical, emotional and environmental issues (modern day stresses, and strains), there is a tendency to deviate from this. The result is that your energy will be depleted which can often lead to illness.

The NES miHealth utilises Global Scaling frequencies as this is the optimum way of transmitting both the NES Information and energy via Bio-electric stimulation into the body. This results in improved well-being. A detailed explanation of Global Scaling is available in: Understanding the Universe through Global Scaling® by seeing the world with new eyes by Dr. Rainer Viehweger. ISBN: 978-3-923589-21-0

**iii Bio-electric Stimulation** is proven to stimulate your body to heal itself as it alerts the body to issues, reminding the body to heal itself.

By sending mild electro impulses (via the nervous system) it alerts the body to activate its self-healing process and reminds the body that there are still issues that need addressing via the process of biofeedback. Extensive research has been undertaken on the efficacy of BEST. An overview of the research and the clinical trials that have been conducted can be found <http://scenar.info/scenar-information.html>

**iv NES ProVision software** is at the forefront of the bio-informational and bioenergetic approach to natural health therapy. Based on a ground-breaking theory of the human body-field, the information network that informs the physical body, NES takes holistic health to new levels of effectiveness. The NES ProVision scanning software and the related NES Infoceuticals give every health practitioner, no matter their speciality, the power to help restore their clients' well-being at the deepest levels.
